

Pro502

+90 & 90i Furnace Familiarization

A detailed overview of the 90% efficient furnaces from Carrier and Bryant

Course Content

This training will familiarize you with the 58MCA single-stage, 58MXA single-stage deluxe and the 58MVP variable-speed multipoise, condensing, gas-fired furnaces. Upon completion of this training, technicians will be familiar with these furnaces and will understand the basic steps to install, start-up, service and troubleshoot them.

Who Should Attend

Installation and service technicians who are new to the industry or those who wish to have a refresher in the Carrier and Bryant 90% furnace line.

What You Will Learn

- Product overview
- Four specific safety procedures in installing these gas furnaces
- Installation and Start-up procedures
- Service Procedures
- Operating sequences
- Troubleshooting tools and techniques
- Wiring Diagrams and test points
- Installation and start-up check list

What You Will Get

- Service manual for Carrier/Bryant 90% furnaces
- Lunch and refreshments will be served

Program Duration - 3 Hours
